Category Theory Seminar — Abstract

October 07, 2025

Noncommutative Poisson structure and invariants of matrices

Speaker: Xabier García-Martínez

Universidade de Santiago de Compostela, Spain

Date & Time: October 07, 2025 (Tuesday) — 4:00 PM (Coimbra time)

Place: Google Meet

Abstract. In this talk we will explain how we used methods coming from non-associative algebras and from computational algebra to obtain the full description of the ring of invariants of pairs of 4×4 matrices, which could not be solved using the standard representation theory methods. Moreover, we will talk about its connection with the Calogero–Moser spaces and the Hilbert scheme of points.
